

Re-Presenting an Amendment to Claim 21 in Compliant Form

21. (Amended) An adhesive tape assembly in the form of a roll, comprising:

a double-sided adhesive tape comprising:

a front adhesive side comprising a heat-activated adhesive layer of a polyolefin heat-activated adhesive, and

a back adhesive side comprising a pressure-sensitive adhesive layer of a pressure-sensitive adhesive; and

a release liner comprising:

a front liner side comprising a release layer in contact with, bonded to and removable from said pressure-sensitive adhesive layer, and

a back liner side comprising a roll stability layer which contacts said heat-activated adhesive layer, said roll stability layer having a contact surface which has a coefficient of friction, when measured against said heat-activated adhesive layer, which provides an increase in roll stability to said adhesive tape assembly when formed into a roll,

said roll having[.]] a width, an outer circumferential edge, and a diameter that is at least about 20 times said width, wherein said roll [[and]] does not fall apart when held suspended along said outer circumferential edge.
